

WY CME Quarter over Quarter June 2021

Reporting period 12 (R12) includes two quarters to account for the transition to the new EHR. All measures are equivalent across the previous and current system except change in Family Contacts, previously "face to face minimum" and now "minimum contact" aligned with CME measures, and the CANS improved uses the "super-global" CANS scores with an update function in the system rather than scoring each item fresh. Efficiency of authorization measure under development and not included in overall measures graph.
