

# By the Numbers: Wyoming's High Fidelity Wraparound

## What is Wyoming's High Fidelity Wraparound Program?

Wyoming's High Fidelity Wraparound is an intensive voluntary care coordination process for youth aged 4 to 20 risking placement out of their home and community due to complex behavioral issues. High Fidelity Wraparound helps families and caregivers build support that meet their needs. The program allows young people to benefit from mental and physical healthcare along with other interventions in their own communities while remaining safely at home, in school and out of trouble.

## Quality of care

**95%** of youth in High Fidelity Wraparound stay in their own homes

**95%** of Caregivers are satisfied with the wraparound process

**84%** of Caregivers are more confident about their ability to care for their child at home

**70%** of youth experience increased functioning

**200+** Wyoming youth currently enrolled in High Fidelity Wraparound

## Cost

**Psychiatric Residential Treatment Facility**

**\$58,027**  
cost per youth per year

**Wyoming's High Fidelity Wraparound**

**\$14,898**  
cost per youth per year

\*includes all Medicaid costs for children in Psychiatric Residential Treatment Facilities compared to children who graduated from High Fidelity Wraparound for State Fiscal Year 2018.

**80%**

Nationally, 80% of youth who need behavioral health services do not receive them.

## Cost responsible

High Fidelity Wraparound can, in some instances, be a great transition from or alternative to:

**In-Patient Treatment**

**Juvenile Justice System**

High Fidelity Wraparound allows children with complex conditions to stay in their:

**Home**

**School**

**Community**

## How can you help?

Refer families to enroll in Wyoming's High Fidelity Wraparound, become a High Fidelity Wraparound provider and support Wyoming's kids by being a champion and educating all about this program.

# Social determinants

## What are social determinants?

Social determinants are conditions in the environments in which people are born, live, learn, work, play, worship and age that affect a wide range of health, functioning and quality-of-life outcomes and risks.

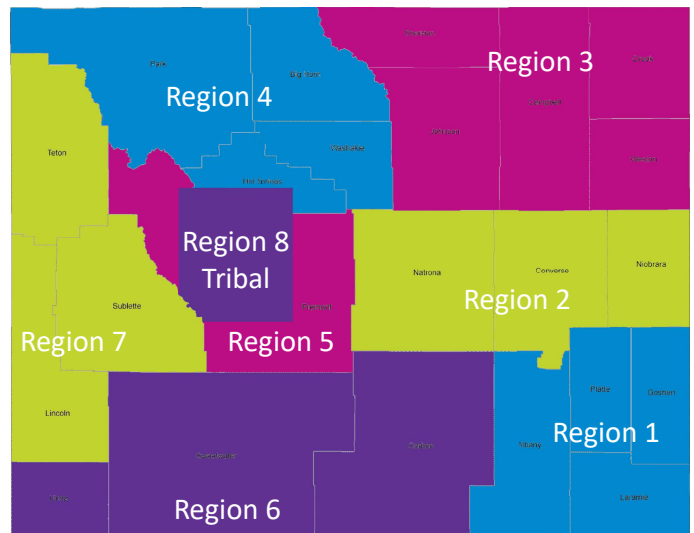

## Why do these matter?

Social determinants matter because they have a powerful influence on health outcomes and overall delivery system costs, and is exactly what our program is designed to positively affect.

Adverse childhood experiences (ACEs) including abuse, neglect and household dysfunction help to **predict behavioral health problems** in childhood and adulthood, worsening mental health, adverse health-related behaviors, chronic disease burden and premature mortality.
